Developed by: Rainbow Studios Published by: THQ NordicCategory: Racing, Simulation, SportsRelease Date: 11.26.19 It is an inevitable fact that monster trucks are awesome. I haven't really followed them outside playing with some Bigfoot toys when I was a kid, and this time my sister brought the whole family to a Monster Jam event one summer (they had an Iron Man truck, it was cool as hell). So while racing games aren't necessarily my jam, when Monster Jam Steel Titans for Nintendo Switch came across the review desk, I was quite interested to see what it had to offer. I mean, it's not like monster trucks are really full-on racing games, right? It's about smashing cars and doing backflips and garbage like that, right? Well, not necessarily. But let's get to it. Big tires, Big Turns Monster trucks are big vehicles; they have big tires and they make quite large turns. As a result, every truck handles like a dying yak, which is probably realistic, but it wasn't fun to spin out at pretty much every turn the first hour to try to get the hang of things. When you are in the groove things are much smoother and more consistent, at least from an uninterrupted handling point of view. A bigger problem, and one that the game never really overcomes, is that trucks lack a consistent sense of weight. They bounce around on the slightest bump, and things that look like they should bend or break under the weight of a monster truck, like a road sign, will send you flying and completely you in a race. Hitting an obstacle or another truck pretty much ends someone some some you have to win some of the race modes and it's a pretty frustrating experience. Beyond the discrepancies in physics, however, it is a solid fun game to play. Driving down once and hitting a big jump, or performing a backflip in the truck is extremely satisfying and appropriately cinematic to watch from many of the available camera angles. Breaking crates, fences and porta potties is fun in destruction mode, but smashing cars is less satisfying than it feels like it should be. It's amazing when real monster trucks do it, but it really doesn't create a sense of power to do it in the game. That's probably the biggest disappointment for me. Oh, and just a quick tip: the tilt controls are on by default. It took me a long time to notice that they were on and I think that's what took me so long to get used to the controls. Learn from my slow wit. Schedule of events Monster Jam Steel Titans offers a few different types of events to participate, and a couple of different ways to experience them. There are six different circuits to complete, each with a few different game types. There are a few different types of races, such as the circuits (where you run in laps), rhythm (kind of drag racing mode) and waypoint (an open track where you only need to hit certain waypoints). Freestyle is trick mode, and destruction allows you to collect points by running around wrecking things. Head-to-head is a tournament race where you compete in a series of one-on-one races. You can play all these modes as either part of a circuit, or in individual one-time events. While there are a number of game types, they are somewhat fenced at first. First of all, you need to complete one circuit before you can move on to another. So while you can make single matches for all game types from the jump after completing the tutorial, the vast majority of venues are locked until you complete them in a corresponding circuit. So if you want to play more than the first two destruction arenas, you need to slog some circuits before you can unlock a new arena - oh, and you have to finish better than third in the circuit to unlock something. So, while there are many venues to explore, it can be a chore to get to what you want. Luckily, all the different trucks are unlocked by buying them from the truck menu, so if you want to break out Grave Digger (and you know you do) it's much easier than getting new maps. On the negative side, the different trucks really don't play any different, so it's really just a cosmetic thing. The Visuals Are Not My Jam Apart from the sometimes dubious physics, monster jam steel titans are a little disappointing visually to boot. The graphics are quite mediocre 3D stuff; the truck models are nice, but a little fuzzy and/or low-res at times. Whole things look a little last generation, and really don't take full advantage of Switch capabilities. I know switch is never to look as good as the PS4 or X-Box (unless the rumored Switch Pro model really ups the system's power), but the Switch can look much better than this. The soundtrack goes very well with the game, with many electronic/rock songs that amper up the game's energy to a satisfactory degree. Jamming with the Titans Monster Jam Steel Titans is unfortunately missing in some key areas that take the game from a fun experience to roughly average. Controlling monster trucks in either race modes or freestyle/trick/destruction modes is fun for the most part. But some finicky physique and insanely solid road signs can ruin your race even if you just barely press them, dropping things from furious and fun to frustratingly futile. I liked the wide range of trucks and tracks, although the trucks were just different cosmetic and the tracks were a little too fenced. In the end, physics was just a little too finicky and the graphics a little too lacking for this to be more than a competent but ultimately mediocre experience. You start with a simple unsponsored truck in a tutorial site called 'Monster Jam University'. After completing some training lessons, you can freely explore the site and even look for some collectibles hidden throughout the map. You can compete in races and various stunt challenges taking place in arenas and outdoor courts. There are several modes available, these include Freestyle, Rhythm, Two-Wheel Skills and Destruction, as well as a local split-screen mode. Unfortunately, online multiplayer is not an option. Monster Jam Steel Titans is available on PlayStation 4, Xbox One, Switch and PC. Take look at our tips for in-game help.
